13

In the Claims

23.   (Once Amended)   The method of claim 19, wherein the software application

a 2   further includes one or more output requestors, and wherein each of said form objects is

associated with one of said output [input] requestors.

55.   (Once Amended)   The computer system of claim 51, wherein the software

a 3   application further includes one or more output requestors, and wherein each of said form

objects is associated with one of said output [input] requestors.

REMARKS

Amendments have been made to the specification to improve the readability of the

application. The amendments made herein are of a clerical, typographical or grammatical

nature. It is submitted that the proposed amendments to the specification do not

constitute new matter or are such to require reexamination.

The amendments to claims 23 and 55 have support in the specification at page 12,
